-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## ***Non-Final Rejection***

### ***Election/Restrictions***

1. Applicant's election with traverse of Species Id claims 1, 7, and 11 in the reply filed on 07/29/2005 is acknowledged. The traversal is on the ground(s) that the restriction requirement is incorrect. This is not found persuasive because the reason has been properly presented in the Office action mailed on 04/29/2005.

The requirement is still deemed proper and is therefore made FINAL.

2. Since claim 7 is found allowable and is generic to claims 8-10; claims 8-10 rejoin for examination. Finally, claims 1 and 7-11 are under examination.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hidano et al (US 5,442,500).

Claim 1, Hidano et al shows a magazine-based data cartridge library in Fig. 2 including: a cabinet 3; a shelf system 2b, located within the cabinet, for supporting at least two data cartridge magazines 30 and including at least one shelf; a drive 95 that is located within the cabinet; a magazine transport device 52, located within the

Art Unit: 2652

cabinet, for moving a data cartridge magazine within a portion of an interior volume defined by the cabinet;

a cartridge transport device, located within the cabinet, for moving a data cartridge 10 between a data cartridge magazine and the drive Column 4, lines 25-31); and an entry/exit port 51 for conveying a data cartridge magazine between an environment that is exterior to the cabinet and a space that is interior to the cabinet; wherein the space is accessible to the magazine transport device so that the magazine transport device can move a data cartridge magazine between the space and the shelf of the shelf system.

***Allowable Subject Matter***

4. Claims 7-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

- Claim 7, as the closest reference, Hidano et al (US 5,442,500) a magazine-based data cartridge library including: a cabinet; at least two data cartridge magazines; a magazine transport device, an entry/exit port for conveying a data cartridge magazine between an environment that is exterior to the cabinet and a space that is interior to the cabinet; the entry/exit port includes a tray; wherein the tray is comprised of a planar surface; **but fails to show** a first end surface that is operatively connected to the planar surface and extends away from the planar surface, a second end surface, and means for allowing the second end surface to move between: (a) a first position that is **in opposition** to the first end surface to prevent movement of a data cartridge magazine in a

Art Unit: 2652

direction with a component transverse to the first and second end surfaces, and  
(b) a second position that is **not in opposition** to the first surface so that a data cartridge magazine can be moved in a direction with a component transverse to the first and second end surfaces.

- Applicant asserts that movable end wall (first surface) is comprised of an S-shaped member that is pivotally attached to brackets as shown in Fig. 18C, to prevent a magazine from entering the operational space of the magazine transport and cartridge transport in an uncontrolled fashion. Moving S-shaped member into the second position so that the magazine transport either remove a magazine from the tray or associate a magazine with the tray ([0121]).

### **Conclusion**

5. The prior art made of record in PTO-892 Form and not relied upon is considered pertinent to applicant's disclosure.
